AURA-Workforce

Reference appendix: the 1,000 technologies that appear across the most occupations in the O*NET database, A–Z. ‘Occs’ is the number of distinct occupations in which the technology is listed.

This is **not** the app's selectable vocabulary. The profile form deliberately offers 45 curated skills and competencies, because a list of thousands cannot be acted on; this appendix shows where that shortlist sits inside a real public taxonomy.
